

MODULE ASSEMBLY

Bringing Your Projects to Life and On Time

We have the ability to self-perform all major aspects of the project including full test fit capabilities.

Faster Time to Market

With more control over the fabrication process end-to-end, we are able to get your projects to market faster.

Reduced Costs = Increased ROI

Lower labor and operational costs are achieved due to a shortened project timeline and efficient use of materials.

Higher Quality Fabrication

Welding, pipe-fitting and other fabrication processes are performed under ideal conditions.

Facilities

Gemini's 56 acre facility specializes in modular assembly. We are capable of simultaneously working on 50+ modules at any given time.

With the ability to perform all major aspects of the project, including full test fit capabilities, Gemini offers the highest ROI on any project.

Capabilities

- ✓ Assembly under gantry crane with 400' length, 50' width, 30' height and 40+ ton lifting capabilities.
- ✓ Erection of prefabricated steel – over 150 tonnes a week.
- ✓ Assembly of ship loose items and in-line components to meet client requirements.
