

WELL PADS & WELL PAIRS

Running Lean & Embracing Standardization

Providing modular fabrication for a series of Well Pad & Well Pair Installations.

Truly Adaptable

Fabricated modules adapt to various well layouts and production start-up strategies.

Ship Complete

We fabricate all modules at our Central Alberta facility and ship completed module packages to the client site.

Custom Fabrication

We custom fabricate for Gas Lift, Rod Pumps, ESPs, Single or Dual String Completions and more.

Lean Manufacturing Doing More With Less.

Less is more. Keeping the number of parts in a product down to a minimum will keep the manufacturing costs down and simplify the process. Gemini employs a culture of lean manufacturing on all our projects.

A Firm Focus on Reducing Redundancies

Practices such as decreasing spacing between well rows & well heads, whether it requires staggering or not is a key element to cost savings as it reduces steel costs.
